

# AWS partner

Nubity was founded in 2013. The founders, professionals with over 20 years' experience in the technology sector, recognized the need to offer cloud management services.

Our goal is to make businesses more technologically efficient and productive by optimizing resource management. In 2019, Nubity was recognized by Amazon Web Services with one of the highest levels, Advanced Consulting Partner, for the versatility and certifications obtained.

Since our inception, we have expanded our team by acquiring clients in Mexico and Argentina. We currently have offices in both countries, allowing us to offer services as [AWS partners](#) throughout Latin America.
