Precision-Engineered Aluminium & uPVC Systems

SLIDING DOORS

Minimalist Slimline Aluminium Sliding Doors

Narrow interlocks and low-profile tracks let the aluminium recede so the view takes over — without giving up strength or smooth daily performance.

- Slim, powder-coated frames that blend into any interior
- Multi-point locking for security without extra bulk
- Smooth-glide rollers built for years of daily use
- Weather seals suited to Rajasthan's heat, dust, and rain

WINDOW SYSTEMS

Slim Aluminium Sliding Window Systems

Less frame at every edge means more usable glass in the same opening — more daylight, better ventilation, and a lighter look overall.

- Narrow sightlines that maximise glass within a fixed opening
- Dust- and heat-resistant seals built for local conditions
- Smooth horizontal glide with minimal maintenance
- Optional mesh integration for airflow without insects

Precision-Engineered Aluminium & uPVC Systems

FULL SYSTEMS

Modern Slim Profile Aluminium Systems

The same slim-frame philosophy applied across a full elevation — doors, windows, and fixed panels that read as one consistent design.

- Consistent frame width across doors, windows, and fixed glass
- Corner and pocket configurations that open a room fully
- Thermal and acoustic performance held to a high standard
- Finishes and hardware built for daily use, not showroom-only

Precision-Engineered Aluminium & uPVC Systems

FRANCHISE OPPORTUNITY

Best Window Franchise in Rajasthan

As demand for slim aluminium and uPVC systems spreads across Rajasthan, EWF backs new franchise partners with the same manufacturing standard used in Jaipur.

- Access to an established, tested product range from day one
- Manufacturing and technical support to keep quality consistent
- Training on installation, sales, and after-service for your team
- Brand recognition from Jaipur, extended into your territory
